GRADUATE HANDBOOK OF ACADEMIC POLICIES AND PROCEDURES

Department of Chemical and Biological Engineering
University of Wisconsin-Madison

Graduate Associate Chair (2019-20): Prof. Michael D. Graham
Graduate Program Coordinator: Kate Fanis

September 2019
SELECTION OF A MAJOR PROFESSOR

STUDENT/PROFESSOR MATCHING

The matching of a student and a major professor takes place early in the first semester of study by a personal and mutual agreement between the student and professor in which the department plays only an indirect role. The department encourages every student to make a serious effort to interview with as many different professors as possible.

PROCEDURE

New Student Orientation begins: August 23, 2019
New graduate students are provided with a list of members of each research group, current projects, and groups that have openings for new students.

Faculty Research Introductions: August 26 through September 3, 2019
New graduate students are required to attend all scheduled faculty research talks. Immediately following the research talks, students should arrange initial interviews with at least five faculty members. These interviews benefit students by enabling them to learn about diverse research opportunities. At the same time, the interviews enable faculty to assess student interest in their research area or in specific projects.

Deadline to submit Initial Interview form: September 20, 2019
Each new graduate student must submit an Initial Interview form indicating at least five professors with whom she or he has met. New students are expected to take the initiative to learn more about potential research opportunities. For example, after initial interviews new students may arrange to meet with additional professors, contact members of research groups, attend group meetings, read relevant literature, or convey their interests in research areas or projects to different professors.

Deadline to submit Major Professor Preference form: October 4, 2019
Students must list their top four choices of advisors in order of preference. In situations where a student wishes to select co-advisors, the name of one advisor should be indicated and the student should clearly communicate their interest in the co-advised project to the advisor. The Graduate Associate Chair, meeting with the professors involved, will recommend assignments of students to advisors. Every effort will be made to reconcile the mutual wishes and best interests of students and professors.
PH.D. DEGREE REQUIREMENTS

COURSE REQUIREMENTS

1. Chemical and Biological Engineering (CBE) Course Requirements
   Students must complete at least six semester courses (totaling at least 18 credits) in the Chemical and Biological Engineering Department. Four courses will be core CBE courses and two will be CBE electives, chosen at the discretion of the student in consultation with their advisor. These classroom courses shall be in the range numbered 500-899 and will not be laboratory courses, Independent Studies, or Research. Grades of B or better are required in all CBE courses used towards degree requirements.

   At least four of the six CBE courses shall be selected from the following set of core graduate classes:

   - CBE 620 Intermediate Transport Phenomena
   - CBE 660 Intermediate Problems in Chemical Engineering
   - CBE 710 Advanced Chemical Engineering Thermodynamics
   - CBE 735 Kinetics and Catalysis
   - CBE 781 Biological Engineering: Molecules, Cells & Systems

   At least two of the core graduate classes must be taken in the first semester of residence in the graduate program, and at least four core graduate classes must be completed with grades of B or better by the end of the second semester of residence. Grades will be reviewed by the Graduate Program Coordinator at the end of the first and second semester to ensure first year students are meeting requirements. A student who receives one grade of BC or lower in a core class but who wishes to remains in the Ph.D. program must take the fifth core course or re-take the low graded core course by the third semester, and the student must receive a B or better. Students are expected to take four classes in their first semester of residence.

   A student who receives more than one grade of BC or lower in core graduate classes will be placed in the M.S. program. The student will receive a letter from the Graduate Associate Chair stating the starting semester of the M.S. program. Upon successful completion of the M.S. program, the student may petition the full faculty for readmission to the Ph.D. program.

2. CBE 961: Seminar Course
   Students must take CBE 961: Seminar- Chemical Engineering within their first two semesters for zero credits. The course meets once a week for one hour. The course does not count towards the requirement of taking four courses in the student's first semester, nor as one of the two CBE electives.

3. Transfer Credits and Substitutions
   The requirement of four core CBE graduate courses shall not be met by substitution of other courses. Students matriculating with an M.S. degree from another university may submit a petition to the Graduate Program Committee, with the approval of their advisor, to transfer up to two courses from their M.S. work toward the requirements of CBE elective courses, the Ph.D. elective, or the minor, if the minor program approves. The petition must include a written explanation from the student explaining why the course from another institution should be allowed to substitute a CBE or UW-Madison course, a written statement of support from their advisor, and any supporting documents they can provide, such as course syllabi and transcripts.

   Students taking advanced courses outside the department in excess of minor requirements may, with departmental approval, use up to two of these courses toward the two CBE elective
courses. Seminar courses may not be used to satisfy CBE course requirements. Students may submit a petition to the Graduate Program Committee, with the approval of their advisor, to ask for the course substitution. The petition must include a written explanation from the student explaining why the outside course should be allowed to substitute a CBE course, a written statement of support from their advisor, and any supporting documents they can provide, such as course syllabi and transcripts.

4. Research Course Requirement
Beginning in the second semester of the first year, all graduate students will enroll in CBE 890: Pre-Dissertator's Research with their advisor(s). Students will enroll in their CBE 890(s) every fall, spring, and summer semester they have a Research Assistantship until they become dissertators.

The number of credits for the CBE 890 in the fall and spring semester should total between 1 and 6, with the standard amount being 2-4. Variation should take into account a minimum enrollment requirement of 8 total credits for all graduate students holding a Research Assistantship and as a minimum credit requirement for international students to maintain full-time student status, and a maximum enrollment limit of 15 credits. A student may only exceed 15 credits with Graduate School permission. If a student would need to enroll in 8 credits in CBE 890 to maintain enrollment, they should talk to the Graduate Program Coordinator about potentially beginning dissertator status (see “Advancement to Dissertator Status” on page 8 for more information). To maintain a Research Assistantship over the summer students must enroll in at least 2 credits of CBE 890. Summer CBE 890 is taken during the 8-week summer session designated “DHH”. More information about enrollment requirements can be found in the Graduate School’s Academic Policy here: https://grad.wisc.edu/documents/enrollment-requirements/

5. Minor Course Requirement – 9 credits
A requirement of the Graduate School is that all graduate students complete a minor program Approval of the proposed minor program should be obtained before the student has completed half of the proposed minor courses, and before the preliminary exam. (See Appendix A, pg. 23 and Appendix B, pg. 24.)

6. Ph.D. Elective Course Requirement – 3 credits
Students must complete at least one course from another program totaling at least three credits. A “B” average is required. Pass/Fail or Audit courses may not be used for the elective course requirement. Courses used to satisfy the minor program may not be used for the Ph.D. elective course requirement. Advisor approval is required and secured through submission of the Ph.D. Elective Course Approval Form. (See Appendix C, pg. 25). Elective courses can be foreign language courses.

7. Other comments regarding course work requirements
A. Residence Credit Requirements - The Graduate School requires that graduate students earn a minimum of 32 graduate level (300 & above) credits at UW-Madison in order for the degree to be considered a UW-Madison degree. The Graduate School will not transfer any graduate work done at another institution toward fulfillment of the minimum UW-Madison credit requirement. (However, you may still transfer work at the department level to fulfill department course requirements).

B. Graduate Credit Requirements – The Graduate School requires at least 51 total credits (300 & above) to complete a Ph.D. At least 26 of these must be completed in CBE courses numbered 600 & above (which can include courses satisfying the CBE core requirement, research credits, as well as seminar courses).

C. Transfer of Prior Coursework – The Graduate School sets the following limits on transfer credits:
i. **Grad Work Other Institutions:** With program approval, students are allowed to count graduate course work from other institutions toward the Minimum Graduate Degree Credit Requirement and the Minimum Graduate Course Work (50%) Requirement. No credits from other institutions can be counted toward the Minimum Graduate Residence Credit Requirement. Course work earned five or more years prior to admission to a master’s degree or earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

ii. **UW-Madison Undergraduate:** With program approval, up to 7 credits numbered 300 or above can be counted toward the Minimum Graduate Degree Credit Requirement. Up to 7 credits of courses numbered 700 or above can be counted toward the Minimum Graduate Course Work (50%) Requirement. No credits can be counted toward the Minimum Graduate Residence Credit Requirement.

iii. **UW-Madison University Special:** With program approval and payment of the difference in tuition (between special and graduate tuition), students are allowed to count up to 15 credits of course work numbered 300 or above taken as a UW-Madison special student toward the Minimum Graduate Residence Credit Requirement, and the Minimum Graduate Degree Credit Requirement. With program approval and payment of the difference in tuition (between special and graduate tuition), students are allowed to count up to 15 credits of courses numbered 700 or above taken as a UW-Madison Special student toward the Minimum Graduate Course Work (50%) Requirement. Course work earned five or more years prior to admission to a master’s degree or earned ten years or more prior to admission to a doctoral degree is not allowed to satisfy requirements.

D. Department approvals of course substitutions, distributed (Option B) minor programs, and other routine degree criteria are administered by the Graduate Program Committee. Novel requests are considered in the departmental faculty meetings. Requests of either type should be submitted to the Graduate Program Coordinator and must include the endorsement of the thesis advisor(s). Supporting information for course substitution petitions using non-UW courses should include a written petition, syllabi, transcript, textbook titles and authors, instructor name, and any other details relevant to the requested use.

**QUALIFYING**

Qualifying for the Ph.D. program requires that graduate students demonstrate both accomplishment in CBE graduate classes and potential as a researcher. To qualify for the Ph.D. program, a graduate student must have completed 32 credits. The student must also meet the requirement of a B or better in 4 out of 5 core CBE courses by the end of their third semester in residence, and have passed the preliminary exam as described below.

**PRELIMINARY EXAM**

The preliminary exam comprises a written report and oral examination.

1. **Written report:** The written portion of the preliminary exam must be submitted to the CBE Graduate Program office by 3:00 pm on January 31 of the second year of residence in the graduate program. If January 31 falls on a weekend, it is due by 3:00 pm on the Monday following the weekend. The scope and objectives of the written report are described in Appendix D, pg.26. Four copies (five for co-advised students) of the preliminary report shall be submitted to the CBE graduate office. These copies must be comb bound or coil bound, and printed or copied double-sided. They will be distributed to each committee member. One additional bound copy is to be submitted for the department files. For students entering the graduate program in January, the written report is due by 3:00 pm on July 15 of the second year of residence. While the scientific aspects of the proposed work should be discussed
between the student and their advisor(s), the written document should be original work by the student. The student is responsible for all aspects of preparation of the written document and oral presentation, including proper citations, formatting, and proofreading.

2. **Oral examination:** Following submission of the written document, the student will be asked to present the oral portion of the preliminary exam between February 7th and March 15th for fall admits or between August 5th and August 15th for spring admits. The composition of the committee and the date of the oral exam shall be submitted to the CBE Graduate Program office by the last day of classes in the fall semester before prelims. The information about the committee and date of exam shall be submitted through the Request for Preliminary Examination Warrant form (see Appendix E, pg. 27). The student shall prepare a 30-minute oral presentation based on their written preliminary report. This oral presentation will be followed by up to 1 ½ hours of questions from the committee.

The committee should be composed with the help of the student's advisor, and will be comprised of the student's advisor, two CBE faculty or affiliate faculty members in the same general area of research, and a fourth member of the department. If a student is co-advised by two faculty or affiliate faculty members from CBE, the committee will be comprised of the student's co-advisors, two additional CBE faculty in the student's area, and a fifth faculty member from the department. [The major professor(s) will not chair the examining committee. In some special instances, the committee may be augmented by personnel from outside the Department of Chemical and Biological Engineering. However, non-CBE faculty and non-affiliates can attend the preliminary exam but do not have voting rights.] It is expected that the members of the preliminary committee will be the members of the student’s 4th Year Research progress meeting. It is also expected that the members of the preliminary committee plus an outside faculty member (if one was not included in the preliminary committee) will be the members of the student’s final defense committee.

The Graduate Program Coordinator will order the warrant from the Graduate School, which will first verify that the student has completed 32 credits toward their degree, their minor has been approved, and their record is cleared of grades of Incomplete and Progress, except for grades of P in CBE 890 or 790. (Note that the minor courses do not need to be completed prior to the preliminary exam. Also note that 890s or 790s with grades of P will not be counted towards credit requirements. All P grades must be changed to S in order for the credits to be counted.)

The Graduate School issues a warrant authorizing the department to admit the student to the preliminary examination. When this warrant is completed and returned to the Graduate School after the student has completed all degree requirements except the dissertation, it serves as the formal application for admission to candidacy for the Ph.D.

In unusual circumstances, petitions for delay may be submitted to the Graduate Associate Chair. Failure to complete the preliminary examination will be regarded as unsatisfactory progress and the case will be brought to the faculty for action.

3. **Grading of Preliminary Exam:** Upon completion of the oral portion of the preliminary exam, each member of the exam committee will submit a grade between 1.0 and 4.0. This grade will reflect equally the exam committee’s assessment of the written document and oral portion of the preliminary exam, using the criteria described in Appendix F, pg. 28. The results of the preliminary examination will be provided to the student within two days via a formal results letter.

A student who receives an average of 3.0 or higher and has passed the core coursework requirement described above, becomes a candidate for the Ph.D. program. A student who does not receive an aggregate score of 3.0 or higher in the qualifying process is placed in the M.S. program. Upon successful completion of the M.S. program, the student may petition the full faculty to be readmitted to the Ph.D. program.
M.S. NOT NORMALLY REQUIRED FOR PH.D.

An M.S. degree is not required for work toward the Ph.D. unless the student has a B.S. in a field other than chemical engineering or unless the faculty requires the student to complete an M.S. based on the results of the qualifying requirements or the student receives grades below the requirements set for core CBE courses.

READMISSION TO THE PH.D. PROGRAM

Students who have been placed in the M.S. program because of course requirements or qualifying requirements may petition for readmission to the Ph.D. program after completing the following requirements.

1. Earning grades of B or better in four core graduate classes. When repeating a core graduate class, the higher grade is counted towards this requirement.

2. Completing the M.S. program. In this case, the M.S. oral exam takes the place of the preliminary oral exam, and the oral presentation should contain a description of future research plans consistent with the requirements of the prelim exam.

Students placed in the M.S. program are expected to finish the M.S. program within five semesters of admission into the Ph.D. program.

The process to petition to rejoin the Ph.D. Ph.D. program is as follows:

1. An M.S. candidate who is seeking re-admission to the Ph.D. program must successfully complete an oral examination before a departmental examining committee of the advisor(s) plus three other CBE faculty members, for a total of 4-5 committee members. The candidate may defend an M.S. thesis (see Appendix G, pg. 29 and Appendix I, p. 34) or an independent study project report in a closed defense. See “M.S. Degree Requirements,” pg. 10, for more information.

2. Upon successful completion of the defense, the student submits a petition to the Graduate Program Committee asking to rejoin the Ph.D. program. The petition should contain a summary of the student’s research and academic accomplishments while in the M.S. program, and future plans for continuing their research in the Ph.D. program.

3. Concurrently, the M.S. exam committee submits a written evaluation of the student containing a recommendation regarding whether the student’s petition should be granted.

4. The Graduate Program Committee brings the petition to the full faculty for a decision.

5. The Graduate Associate Chair will inform the student of the faculty’s decision in writing.

RESEARCH PROGRESS MEETING

Each student will schedule a mandatory research progress meeting with their thesis committee during the fall semester of the fourth year. Committees are expected to be comprised of the same faculty from their preliminary exam committee- the student’s academic advisor and two additional faculty members from the department in their area, plus one additional faculty member from the department. If a student is co-advised by two faculty or affiliate faculty members from CBE, the committee will be comprised of the student’s co-advisors, two additional CBE faculty in the student’s area, and a fifth faculty member from the department. However, it is acceptable for the student to swap out the fourth or fifth member of the committee for a faculty member from outside the department. This can be done as preparation for
the final defense committee where an outside faculty member will be required. [Non-CBE faculty and non-affiliates may attend the research progress meeting.] The meeting will consist of a 30-minute oral presentation by the student on research progress followed by a 30-minute discussion, with a written assessment provided to the student and placed in the student’s file.

One week before the presentation, the student should submit to the committee a one-page document containing an abstract of the student’s research, including background, accomplishments and plans, as well as lists of conference presentations, completed and planned publications. Other information such as participation in internships or campus professional development activities may be included as well.

The presentation should outline background and motivation for the student’s research, a description of research accomplishments to date, and plans for future work, including a tentative timeline. A summary of the student’s completed and planned publications should be included.

TEACHING ASSISTANTSHIP REQUIREMENT

Each student in the Ph.D. program is required to serve as a teaching assistant (TA) for two semesters. Under normal circumstances, each student should TA one semester of their second year and one semester of their third year. Requests for alternate arrangements, partial or full waiver of the requirement should be submitted in writing to the Graduate Program Committee.

ADVANCEMENT TO DISSERTATOR STATUS

A student is granted dissertator status after passing the preliminary examination, completing all major and minor requirements except the dissertation (this includes any required course work and the qualifying requirement), and satisfying the Ph.D. Minimum Graduate Residence Credit Requirement.

To register as a dissertator for a given semester, the student must complete all requirements for dissertator status before the first day of classes. The student must contact the Graduate Program Coordinator one month before the end of the semester before they intend to begin dissertator status to initiate the process.

Dissertators register for a reduced course load of three graduate-level credits that are directly related to the dissertation research. Normally, this means CBE 990 and/or required seminars. With advisor’s approval, a graduate-level 3-credit course may be substituted. The dissertator must register each fall and spring semester for three credits until the Ph.D. dissertation has been deposited at the Graduate School, per the Continuous Enrollment Requirement. Students must register for 3 credits in the summer semester’s DHH session if they hold a Research Assistantship, have an internship, fellowship, or traineeship that requires them to register, or if they intend to defend and deposit their dissertation over the summer semester. Students who fail to maintain continuous registration will be assessed a Ph.D. completion fee of up to 12 times the current per-credit fee, per the Degree Completion Fee policy of the Graduate School. For more information on enrollment requirements, see the Graduate School Academic policy here: https://grad.wisc.edu/documents/enrollment-requirements/

THESIS AND FINAL DEFENSE

Guidelines for preparation of the Ph.D. thesis are given in Appendix G (pg. 29). The student defends the thesis in a final oral examination, or defense. Before the oral exam, the student must clear all grades of Incomplete from their record, and complete all other requirements for the degree. In consultation with the major professor(s), the student chooses an examination committee of at least four faculty members, including at least one, but not more than two, from outside the department. If a student is co-advised by two faculty or affiliate faculty members from CBE, the committee must contain at least five faculty members, including at least one, but not more than two, from outside the
department. It is expected that the committee will be comprised of the same faculty members as the 4th Year Research Meeting, with the swapping out of the fourth or fifth member of the committee for a faculty member from outside the department if one was not previously included. [Examples of acceptable outside members include: faculty, scientists, or post-docs from another department on campus, or from another institution or organization (i.e. national lab or Chem E. related business)]. An emeritus professor may serve on a Ph.D. examination committee if less than one year has elapsed since their retirement. Three members of the committee must be designated as readers. A copy of the thesis must be submitted to all members of the final oral defense committee at least two weeks prior to the date of the final oral examination. For more information on committees, see the Graduate School Academic Policy here: https://grad.wisc.edu/documents/committees/

The student submits the names of the committee members to the Graduate Program Coordinator on the Ph.D. Final Oral Exam Committee Form, as seen in Appendix H (pg. 33) at least three weeks before the date of the final defense. The Graduate Program Coordinator will then request a warrant from the Graduate School based on the information provided on this form. The warrant will then be presented to the final oral examination committee at the examination and successful completion of the exam is indicated by the signatures of the committee members on the warrant, which is then returned to the Graduate Program Coordinator, and then the Graduate School.

The Graduate School requires that the final oral examination for the Ph.D. must be taken within five years of passing the preliminary examination, or the student will be required to take another preliminary examination.

**LENGTH OF TIME TO DEGREE ≤5 YEARS**

Students are expected to complete their Ph.D. degree in ≤5 years (by August 31, 2024 for students entering in Fall 2019). Any student unable to defend their thesis in this period must petition the faculty for an extension by July 1 of the fifth year. All petition requests are for one year and should include the following:

- Date of Petition
- Name of student
- Name of advisor
- Accomplishments to date (300 words or less)
- Extenuating circumstances, if any
- Plans for degree completion (include predicted defense date)
- A list of publications published, in press or submitted

Extension requests should be submitted to the Graduate Program office – EH 2033 NO LATER THAN JULY 1.
M.S. DEGREE REQUIREMENTS

To qualify for the master’s degree, the student must complete a minimum of 30 graduate-level credits (300 & above), 24 of which must come from these two groups: I, a professional group; and II, an elective group. The student must maintain a B average or better in graduate work.

The professional group, I, must comprise a minimum of 12 credits of CBE courses. At least six credits of group I must be in the range numbered 600 to 899 (excluding research). Grades of B or better are required for credit in the professional group.

Students placed on the M.S. track as a result of two or more grades of BC in core courses are required to make up the course deficiencies as well as complete a master’s degree. Course deficiencies should be made up on the usual preliminary exam schedule.

The elective group, II, must comprise a minimum of 12 credits of graduate courses. At least six of these shall be in departments other than Chemical and Biological Engineering and shall be chosen for their relevance to CBE. In general, grades of B or better are required for credit in this group, but grades of BC or C in non-CBE courses will be counted if balanced credit for credit by grades of A or AB in other courses from this group.

Up to six credits will be allowed for CBE courses numbered between 300 and 499 in groups I and II combined, provided equivalent courses were not previously taken by the student.

An M.S. candidate not planning to seek re-admission to the Ph.D. program must successfully complete an oral examination before a departmental examining committee of the advisor(s) plus two other CBE faculty members, for a total of 3-4 committee members.

An M.S. candidate who is seeking re-admission to the Ph.D. program must successfully complete an oral examination before a departmental examining committee of the advisor(s) plus three other CBE faculty members. The candidate may defend an M.S. thesis (see Appendix G, pg. 29 and Appendix I, p. 34) or an independent study project report in a closed defense. The defense of an independent study project is conducted in a closed session.

The process to petition to rejoin the Ph.D. program is as follows:

1. Upon successful completion of the defense, the student submits a petition to the Graduate Program Committee asking to rejoin the Ph.D. program. The petition should contain a summary of the student’s research and academic accomplishments while in the M.S. program, and future plans for continuing their research in the Ph.D. program.

2. Concurrently, the M.S. exam committee submits a written evaluation of the student containing a recommendation regarding whether the student’s petition should be granted.

3. The Graduate Program Committee brings the petition to the full faculty for a decision.

4. The Graduate Associate Chair will inform the student of the faculty’s decision in writing.

When a candidate presents a thesis, no fewer than five nor more than 14 credits of research (CBE 790) may be counted toward the 30 credit total requirement. When a thesis is not presented, a maximum of 12 credits of research may be counted toward the total.

The Graduate School requires that the M.S. candidate earn at least 16 graduate-level credits (300 & above) at UW-Madison in order for the degree to be considered a UW-Madison degree.
School will not transfer any graduate work done at another institution toward fulfillment of the minimum UW-Madison credit requirement. An M.S. candidate who does not register for graduate work for five or more consecutive years will lose all residence credit.

Before the oral M.S. examination, the student fills out a Master’s Degree Warrant Request Form (see Appendix I, pg. 34) and the Graduate Program Coordinator requests the warrant from the Graduate School. A warrant will not be issued unless the student has cleared all grades of Incomplete and is registered for a program that will permit completion of the minimum credit requirement by the end of the current semester. After the examination, the student returns the signed warrant to the Graduate School. If a formal thesis is presented, it must be deposited in Memorial Library in accordance with instructions provided by the Graduate School.

Students who enter the program without a Bachelor of Science in Chemical Engineering may be required to take remedial coursework. These courses may include:

- CBE 320 4 cr.
- CBE 326 3 cr.
- CBE 426 3 cr.
- CBE 430 3 cr.
- CBE 440 3 cr.
- CBE 450 (or 470) 3 cr.
CRITERIA FOR SATISFACTORY PROGRESS TOWARD ADVANCED DEGREES

SATISFACTORY PROGRESS

Candidates for advanced degrees in chemical engineering are expected to meet the criteria and time schedules shown below. In addition, the candidate must have an advisor and receive a satisfactory appraisal from them. This will normally be reflected by the grade in the research course. The time schedules take into account the effect teaching may have on the rate of completion of a degree program.

The cases of any students failing to make satisfactory progress will be brought to the attention of the departmental faculty by the student’s major professor or graduate advisor for review and appropriate action.

QUALITY OF WORK

CBE courses  Grade of B or better is required for courses used to meet degree requirements
Other courses  Average grade B with all grades C or above
Research  P (in Progress) or S (Satisfactory)

CREDIT LOAD

Students holding a departmental appointment (RA, RA/TA, or Fellow) must be enrolled as full-time students during the academic year and must be enrolled for at least the minimum number of credits in summer. Only graduate-level credits, numbered 300 or above, count toward these credit loads. Courses numbered below 300, even when taken to fulfill a degree requirement, are not considered graduate-level credits.

Full-time Student Credit Loads

<table>
<thead>
<tr>
<th></th>
<th>Fall &amp; Spring semesters</th>
<th>Summer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pre-dissertator</td>
<td>8-15 credits*</td>
<td>2-4 credits* 2 credits minimum during DHH session</td>
</tr>
<tr>
<td></td>
<td></td>
<td>to hold a RAship</td>
</tr>
<tr>
<td>Dissertator</td>
<td>3 credits only*</td>
<td></td>
</tr>
</tbody>
</table>

* Graduate-level credits, i.e. numbered ≥300 (no audits or pass-fail).

Students who do not register for at least the minimum number of credits shown above will not qualify as full-time students for payroll purposes and may forfeit their appointment and its associated benefits (health insurance, etc.).

Maximum credit loads: Graduate students generally may not enroll for more than 15 credits of graduate courses (≥ 300) in any semester or summer. Higher loads require special permission from the Graduate School Dean, and may incur extra tuition charges. Courses numbered below 300 (such as some language courses) do not count toward this limit.
COMPLETION TIMES

1. M.S.: Should normally be completed within 1 1/2 to 2 calendar years of matriculation.

2. Ph.D.: Preliminary exam: Written portion should be completed by January 31 of the second year of residence in the graduate program, and oral portion by March 15th. For students entering in January, the written report is due July 15 of the second year of residence and the oral portion must be completed by August 15th.

CBE core course requirement: Two must be completed the first semester. All four must be completed by the end of the third semester in residence.

CBE elective course requirement: Must be completed before dissertator status will be granted.

CBE seminar course requirement: CBE 961 must be completed within the student's first two semesters in residence.

Ph.D. Elective course requirement: Must be completed before dissertator status will be granted.

Minor: The minor must be approved before ordering the preliminary exam warrant. Approval of the proposed minor program should be obtained before the student has completed half of the proposed minor courses. All minor courses must be completed before dissertator status will be granted.

Final oral exam: Students are expected to finish the Ph.D. within five years of matriculation. Scheduling of thesis work and the thesis defense is arranged between the student and the major professor.

GRADUATE SCHOOL REQUIREMENTS

The Graduate School requires that students maintain a minimum graduate GPA of 3.00 in any course taken as a graduate student (excluding research, audit, credit/no credit, and pass/fail courses), unless probationary admission conditions require higher grades. The Graduate School also considers Incomplete (I) grades to be unsatisfactory if they are not removed during the subsequent semester of enrollment; however, the instructor may impose an earlier deadline.

A student may be placed on probation or suspended from the Graduate School for low grades or for failing to resolve incompletes in a timely fashion. In special cases the Graduate School permits students who do not meet these minimum standards to continue on probation upon recommendation and support of their advisor.

Most programs require satisfactory progress to continue guaranteed funding support. Unsatisfactory progress may cause you to lose a TA, RA, or Fellowship appointment, and possibly your status as a graduate student.

PROBATION

If a student was admitted on probation and they satisfy the conditions outlined at the time of admission, probationary status will be removed automatically. Once their studies have begun, students are expected to make satisfactory progress toward their degree.
Students must be in good academic standing with the Graduate School, their program, and their advisor. The Graduate School regularly reviews the record of any student who received grades of BC, C, D, F, or I in graduate-level courses (300 or above), or grades of U in research and thesis. This review could result in academic probation with a hold on future enrollment, and the student may be suspended from graduate studies.

The Graduate School may also put students on probation for incompletes not cleared within one term. Dissertators will not be placed on probation for incomplete grades in research courses. All incomplete grades must be resolved before a degree is granted.

Please note that any student who is on probation will not be able to enroll for the following semester until their final grades are submitted and the Graduate School has verified they are making satisfactory progress. For any questions relating to probation, please contact Amy Kuether, Academic Services Coordinator, at (608) 265-0519 or amy.kuether@wisc.edu.

CONDUCT EXPECTATIONS

PROFESSIONAL CONDUCT

All students are expected to adhere to the highest standards of professional behavior and ethics. Students should avoid even an appearance of improper behavior or lack of ethical standards while in Graduate School at UW-Madison, in all professional settings, and in their personal lives. Students should conduct themselves according to the standards expected of members of the profession to which the student aspires. Concerns about infractions of Professional Conduct may be effectively handled informally between the instructor/advisor and the student. If a resolution is not achieved, a graduate program representative may be included in the discussion. Separate and apart from a violation of Professional Conduct, a student may face University disciplinary action with regard to the same action. Students are responsible for reading the information here as well as the information published on all the relevant websites. Lack of knowledge of this information does not excuse any infraction. The relevant websites are: The Office of Student Conduct and Community Standards (https://conduct.students.wisc.edu/) and the Graduate School Academic Policy and Procedures (https://grad.wisc.edu/academic-policies/).

1. Professional Ethics: Students shall: show respect for a diversity of opinions, perspectives, and cultures; accurately represent their work and acknowledge the contributions of others; aim to gain knowledge and contribute to the knowledge base of others; understand the UW Student Code of Conduct (https://conduct.students.wisc.edu/); represent their profession and the program; and strive to incorporate and practice disciplinary ideals in their daily lives. Resumes/CVs must reflect accurate information.

2. Honesty and Integrity: Students shall demonstrate honesty and integrity as shown by: honesty and ethics in research and IRB applications—including honesty in interpretation of data; commitment to an unbiased interpretation of academic and professional endeavors; and the need to document research activities, protect subject/client confidentiality and HIPPA regulations. Students shall: follow-through and pull their weight in group activities and understand where collaboration among students is or is not allowed; not plagiarize others or past work (self-plagiarism), cheat, or purposefully undermine the work of others; and avoid conflicts of interest for the duration of their time in the program. As a professional, honesty and integrity also extends to personal behavior in life outside of the academic setting by realizing that students are representatives of the program, UW-Madison, and the profession as a whole.

3. Interpersonal and Workplace Relationships: Students shall interact with peers, faculty, staff and those they encounter in their professional capacity in a manner that is respectful, considerate, and professional. This includes and is not limited to attending all scheduled meetings, honoring
agreed upon work schedules, being on-time and prepared for work/meetings, contributing collaboratively to the team, keeping the lines of communication open, offering prompt response to inquiries, and employing respectful use of available equipment/technology/resources. Chronic or unexplained absences are unprofessional in the workplace and could be grounds for termination or removal of funding. To facilitate the free and open exchange of ideas, any criticism shall be offered in a constructive manner, and the right of others to hold different opinions shall be respected.

4. Commitment to Learning: Students are expected to meet their educational responsibilities at all times. Be actively prepared for class and be ready for questions and answers. Be on time for every class and always show courtesy during class or if you have to leave class early. If possible, students should notify the instructor at least one day in advance of a planned absence. Students who are unable to attend class are responsible for finding out what occurred that day and should not expect instructors to give them individual instruction. Recognizing that the pursuit of knowledge is a continuous process, students shall show commitment to learning by persevering despite adversity and seeking guidance in order to adapt to change. Students shall strive for academic excellence and pursue and incorporate all critique, both positive and negative, in the acquisition of knowledge in order to understand and respect the community in which they work.

5. Professional Appearance: Students shall recognize that the UW campus is a professional environment, and that laboratory environments in particular require attire and hygiene that accord with safety and protective clothing protocols.

This graduate program, the Graduate School, and the Division of Student Life all uphold the UW-System policies and procedures in place for academic and non-academic misconduct. In addition, graduate students are held to the same standards of responsible conduct of research as faculty and staff. Furthermore, unprofessional behavior towards clients/subjects, faculty, staff, peers and public are significant issues in the evaluation and promotion of students. In turn, we hold expectations for the highest level of academic integrity and expect professional, ethical, and respectful conduct in all interactions. Students may be disciplined or dismissed from the graduate program for misconduct or disregard for professional conduct expectations regardless of their academic standing in the program. Separate and apart from a violation of Professional Conduct, a student may face University disciplinary action with regard to the same action. Students are responsible for reading the information here as well as the information published on all the relevant web sites, as mentioned before. Lack of knowledge of this information does not excuse any infraction.

ACADEMIC MISCONDUCT

Academic misconduct is an act in which a student (UWS 14.03(1)):  
1. seeks to claim credit for the work or efforts of another without authorization or citation;  
2. uses unauthorized materials or fabricated data in any academic exercise;  
3. forges or falsifies academic documents or records;  
4. intentionally impedes or damages the academic work of others;  
5. engages in conduct aimed at making false representation of a student's academic performance;  
or  
6. assists other students in any of these acts.

Examples of academic misconduct include but are not limited to:  
1. cutting and pasting text from the Web without quotation marks or proper citation;  
2. paraphrasing from the Web without crediting the source;  
3. using notes or a programmable calculator in an exam when such use is not allowed;  
4. using another person's ideas, words, or research and presenting it as one's own by not properly crediting the originator;  
5. stealing examinations or course materials;
6. changing or creating data in a lab experiment;
7. altering a transcript;
8. signing another person’s name to an attendance sheet;
9. hiding a book knowing that another student needs it to prepare for an assignment;
10. collaboration that is contrary to the stated rules of the course; or
11. tampering with a lab experiment or computer program of another student.

Dean of Students Office: Information for Students: How to Avoid Academic Misconduct? What Happens If I Engage in Academic Misconduct? What Should I Do If I know a Classmate is Cheating? www.students.wisc.edu/doso/students.html

Dean of Students Office: Academic Misconduct Flowchart: www.students.wisc.edu/doso/misconductflowchart.html

NON-ACADEMIC MISCONDUCT

The University may discipline a student in non-academic matters in the following situations:
1. for conduct which constitutes a serious danger to the personal safety of a member of the university community or guest;
2. for stalking or harassment;
3. for conduct that seriously damages or destroys university property or attempts to damage or destroy university property, or the property of a member of the university community or guest;
4. for conduct that obstructs or seriously impairs university-run or university-authorized activities, or that interferes with or impedes the ability of a member of the university community, or guest, to participate in university-run or university-authorized activities;
5. for unauthorized possession of university property or property of another member of the university community or guest;
6. for acts which violate the provisions of UWS 18, Conduct on University Lands;
7. for knowingly making a false statement to any university employee or agent on a university-related matter, or for refusing to identify oneself to such employee or agent;
8. for violating a standard of conduct, or other requirement or restriction imposed in connection with disciplinary action.

Examples of non-academic misconduct include but are not limited to:
1. engaging in conduct that is a crime involving danger to property or persons, as defined in UWS 18.06(22)(d);
2. attacking or otherwise physically abusing, threatening to physically injure, or physically intimidating a member of the university community or a guest;
3. attacking or throwing rocks or other dangerous objects at law enforcement personnel, or inciting others to do so;
4. selling or delivering a controlled substance, as defined in 161 Wis. Stats., or possessing a controlled substance with intent to sell or deliver;
5. removing, tampering with, or otherwise rendering useless university equipment or property intended for use in preserving or protecting the safety of members of the university community, such as fire alarms, fire extinguisher, fire exit signs, first aid equipment, or emergency telephones; or obstructing fire escape routes;
6. preventing or blocking physical entry to or exit from a university building, corridor, or room;
7. engaging in shouted interruptions, whistling, or similar means of interfering with a classroom presentation or a university-sponsored speech or program;
8. obstructing a university officer or employee engaged in the lawful performance of duties;
9. obstructing or interfering with a student engaged in attending classes or participating in university-run or university-authorized activities;
10. knowingly disrupting access to university computing resources or misusing university computing resources.

RESEARCH MISCONDUCT

Much of graduate education is carried out not in classrooms, but in laboratories and other research venues, often supported by federal or other external funding sources. Indeed, it is often difficult to distinguish between academic misconduct and cases of research misconduct. Graduate students are held to the same standards of responsible conduct of research as faculty and staff. The Graduate School is responsible for investigating allegations of research misconduct. This is often done in consultation with the Division of Student Life as well as with federal and state agencies to monitor, investigate, determine sanctions, and train about the responsible conduct of research. For more information, contact the Associate Vice Chancellor for Research Policy, 333 Bascom Hall, (608) 262-1044.

Please see section on “Grievance Procedures and Misconduct Reporting” for further information on reporting research misconduct of others. Here are links for additional information regarding Research Misconduct and Responsible Conduct:

Graduate School Policies & Procedures: Responsible Conduct of Research www.grad.wisc.edu/acadpolicy/#responsibleconductofresearch

PARENTAL LEAVE POLICY FOR GRADUATE STUDENT ASSISTANTS

The College of Engineering (CoE) is fully committed to providing a climate of support for women and their partners who choose to have children during their graduate studies. The goal of this CoE parental leave policy is to reduce academic and financial hardships for a) female graduate students during the late stages of their pregnancy, childbirth, and postpartum periods, and b) any graduate student who is a new parent providing care for their infant.

All CoE graduate students with current research, teaching, or project assistantships are eligible to request a parental leave under this policy. Upon request, expectant mothers will be provided with 12 weeks of paid accommodation time for childbirth. Other new parents (father, adoptive mother, and adoptive father) will, upon request, be provided with 6 weeks of paid accommodation time. There will be no research or teaching expectations of the student during the leave.

Students should ideally notify their department (through the Department Administrator or Department Chair) six months prior to the expected birth to request the leave. Students should alert their research advisor or TA coordinator at that time as well to ensure that the ongoing research and teaching environment is safe for the expectant mother. It is recognized that each case will be unique in terms of the timing of the pregnancy or adoption relative to the academic calendar and that creative and supportive solutions will be required on the part of advisors, chairs, TA coordinators, etc.

The leave will ordinarily begin at the time of birth, but other proposals will be considered. Departments – both advisors and chairs – are expected to provide flexibility in working out the details of the leave and to adjust the timeline of the leave as needed to accommodate any unexpected medical issues that arise during pregnancy (e.g. doctor-ordered bed rest).

All academic requirement deadlines (e.g., qualifying exams) will be extended for the student requesting the leave, consistent with department academic timelines.

TUITION REMISSION AND FEE PAYMENT

Tuition remission is provided for graduate students who hold at least a 33.4% appointment as an RA and/or TA. Fellowships often pay both tuition and fees. If you have any questions regarding your tuition bill, see the payroll coordinator. Your monthly stipend covers your educational expenses which includes funds to pay your segregated fees. You are responsible for paying your segregated fees each semester.

GRIEVANCE PROCEDURES & REPORTING MISCONDUCT AND CRIME

If a student feels unfairly treated or aggrieved by faculty, staff, or another student, the University offers several avenues to resolve the grievance. Students' concerns about unfair treatment are best handled directly with the person responsible for the objectionable action. If the student is uncomfortable making direct contact with the individual(s) involved, they should contact the advisor or the person in charge of the unit where the action occurred (program or department chair, section chair, lab manager, etc.). For more information see the Graduate School Academic Policies & Procedures: https://grad.wisc.edu/acadpolicy/?policy=grievancesandappeals The Assistant Dean for Graduate Affairs (engr-dean-graduateaffairs@engr.wisc.edu) provides overall leadership for graduate education in the College of Engineering (CoE), and is a point of contact for graduate students who have concerns about education, mentoring, research, or other difficulties.
PROcedures

1. The student is encouraged to speak first with the person toward whom the grievance is directed to see if a situation can be resolved at this level.

2. Should a satisfactory resolution not be achieved, the student should contact the CBE Graduate Associate Chair, or Department Chair if the grievance involves the Graduate Associate Chair, to discuss the grievance. The Graduate Associate Chair or Department Chair will facilitate problem resolution through informal channels and facilitate any complaints or issues of students. The first attempt is to help students informally address the grievance prior to any formal complaint. Students are also encouraged to talk with their faculty advisors regarding concerns or difficulties if necessary. University resources for sexual harassment, discrimination, disability accommodations, and other related concerns can be found on the UW Office of Equity and Diversity website: https://oed.wisc.edu/. Other campus resources include:
   - The Graduate School – www.grad.wisc.edu
   - McBurney Disability Resource Center – www.mcburney.wisc.edu
   - Employee Assistance Office – www.eao.wisc.edu
   - Ombuds Office – www.ombuds.wisc.edu
   - University Health Services – www.uhs.wisc.edu
   - UW Office of Equity and Diversity - www.oed.wisc.edu/index.html

3. If the issue is not resolved to the student’s satisfaction the student can submit the grievance to the Graduate Associate Chair in writing, within 60 calendar days of the alleged unfair treatment.

4. On receipt of a written complaint, a faculty committee will be convened by the Graduate Associate Chair to manage the grievance. The faculty committee will obtain a written response from the person, organization, or governing committee toward whom the complaint is directed. This response will be shared with the person filing the grievance.

5. The faculty committee will determine a decision regarding the grievance. The Graduate Associate Chair will report on the action taken by the committee in writing to both the student and the person, organization, or governing committee toward whom the complaint was directed within 20 working days from the date the complaint was received.

6. At this point, if either party (the student or the person, organization, or governing committee toward whom the grievance is directed) is unsatisfied with the decision of the faculty committee, the party may file a written appeal. Either party has 10 working days to file a written appeal to the College of Engineering. The Assistant Dean for Graduate Affairs (engr-dean-graduateaffairs@engr.wisc.edu) provides overall leadership for graduate education in the College of Engineering (CoE), and is a point of contact for graduate students who have concerns about education, mentoring, research, or other difficulties.

7. Documentation of the grievance will be stored for at least 7 years. Significant grievances that set a precedent will be stored indefinitely.

The Graduate School has procedures for students wishing to appeal a grievance decision made at the College of Engineering level. These policies are described in the Graduate School’s Academic Policies & Procedures: https://grad.wisc.edu/acadpolicy/?policy=grievancesandappeals.

Reporting Misconduct and Crime

The campus has established policies governing student conduct, academic dishonesty, discrimination, and harassment/abuse as well as specific reporting requirements in certain cases. If you have a grievance regarding unfair treatment towards yourself, please reference the procedures and resources
identified above. If you learn about, observe, or witness misconduct or other wrongdoing you may be required to report that misconduct or abuse. Depending on the situation, it may be appropriate to consult with your advisor, Graduate Program Coordinator, or other campus resources (such as the UW Office of Equity and Diversity, Graduate School, McBurney Disability Resource Center, Employee Assistance Office, Ombuds Office, and University Health Services).

RESEARCH MISCONDUCT

The University of Wisconsin-Madison strives to foster the highest scholarly and ethical standards among its students, faculty, and staff. Graduate students and research associates are among the most vulnerable groups when reporting misconduct because their source of financial support and the progress in their careers may be at risk by raising questions of wrongdoing. They are also often the closest witnesses to wrongdoing when it occurs and therefore must be appropriately protected from the consequences of reporting wrongdoing and be informed of their rights. Please find full details at https://research.wisc.edu/compliance-policy/research-ethics/.

ACADEMIC MISCONDUCT

If you know a classmate is cheating on an exam or other academic exercise, notify your professor, teaching assistant or proctor of the exam. As a part of the university community, you are expected to uphold the standards of the university. Also, consider how your classmate’s dishonesty may affect the overall grading curve and integrity of the program.

SEXUAL ASSAULT REPORTING

Faculty, staff, teaching assistants, and others who work directly with students at UW-Madison are required by law to report first-hand knowledge or disclosures of sexual assault to university officials, specifically the Office for Equity & Diversity or the Division of Student Life. This effort is not the same as filing a criminal report. Disclosing the victim’s name is not required as part of this report. Please find full details at http://www.oed.wisc.edu/sexualharassment/assault.html and https://doso.students.wisc.edu/services/sexual-assault-dating-and-domestic-violence/.

CHILD ABUSE REPORTING

As a UW-Madison employee (under Wisconsin Executive Order #54), you are required to immediately report child abuse or neglect to Child Protective Services (CPS) or law enforcement if, in the course of employment, the employee observes an incident or threat of child abuse or neglect, or learns of an incident or threat of child abuse or neglect, and the employee has reasonable cause to believe that child abuse or neglect has occurred or will occur. Volunteers working for UW-Madison sponsored programs or activities are also expected to report suspected abuse or neglect. Please find full details at http://www.oed.wisc.edu/childabuse/.

INCIDENTS OF BIAS/HATE

The University of Wisconsin-Madison values a diverse community where all members are able to participate fully in the Wisconsin Experience. Incidents of Bias/Hate affecting a person or group create a hostile climate and negatively impact the quality of the Wisconsin Experience for community members. UW-Madison takes such incidents seriously and will investigate and respond to reported or observed incidents of bias/hate. Please find full details at https://doso.students.wisc.edu/services/bias-reporting-process/.
HOSTILE AND INTIMIDATING BEHAVIOR

Hostile and intimidating behavior, sometimes known by the shorthand term “bullying”, is defined in university policy as “unwelcome behavior pervasive or severe to the extent that it makes the conditions for work inhospitable and impairs another person’s ability to carry out his/her responsibilities to the university.” A person or a group can perpetrate this behavior. The person need not be more senior than or a supervisor to the target.

Hostile and intimidating behavior (HIB) can occur in the university setting. Even individual instances of such behavior can have a significant effect on the person it’s aimed at, and can take a physical and emotional toll, reduce the effectiveness of a person’s work or learning. It is a significant reason for unhealthy workplace climate and culture, and should be addressed immediately. Hostile and intimidating behavior is prohibited by university policy. Unacceptable behavior may include, but is not limited to:

- Abusive expression (including spoken, written, recorded, visual, digital, or nonverbal, etc.) directed at another person in the workplace, such as derogatory remarks or epithets that are outside the range of commonly accepted expressions of disagreement, disapproval, or critique in an academic culture and professional setting that respects free expression;
- Unwarranted physical contact or intimidating gestures;
- Conspicuous exclusion or isolation having the effect of harming another person’s reputation in the workplace and hindering another person’s work;
- Sabotage of another person’s work or impeding another person’s capacity for academic expression, be it oral, written, or other;
- Abuse of authority, such as using threats or retaliation in the exercise of authority, supervision, or guidance, or impeding another person from exercising shared governance rights, etc.

Repeated acts or a pattern of hostile and/or intimidating behaviors are of particular concern. A single act typically will not be sufficient to warrant discipline or dismissal, but an especially severe or egregious act may warrant either.

WHAT TO DO IF YOU FEEL YOU HAVE BEEN THE TARGET OF HIB

Undesired consequences of hostile and intimidating behavior can be avoided or minimized when the problem is addressed early on, but victims are often hesitant to pursue a formal process before the impact is severe. Educational opportunities and campus resources have been implemented with the intent of aiding all employees and students in defusing situations before they become severe. These resources, including trained personnel who can advise and mediate, comprise the “informal process.” It is possible that situations will continue to arise in which informal interventions are not effective, and the “formal process” has been designed to address those situations.

You are encouraged to seek out advice and consultation after the first instance of hostile and intimidating behavior: consultation is not escalation. Discussing what’s happened in a timely way can often prevent continued bullying. Here are some ways to do this:

- Seek advice from a trusted colleague;
- You may choose to seek informal resolution by approaching the individual yourself or with an intermediary;
- Consult your advisor, human resources representative, department chair, director, dean, or any campus resource to discuss options for resolution;
- Keep notes of what happened, when, where, and who was present. Retain copies of any correspondence.
Graduate Students sometimes experience hostile and intimidating behavior from faculty members. If you are a student who is experiencing such behavior, you are entitled to support as a university employee through the Ombuds office, the Dean of Students office, and (if a grad student) the Graduate School. Graduate student workers should also consult with Graduate Coordinators, TAA Stewards, and/or the Graduate School.

CBE graduate students with concerns may contact the Associate Chair for Graduate and Studies, or the College of Engineering Assistant Dean for Graduate Affairs. Additional campus information on hostile and intimidating behavior is available at https://hr.wisc.edu/hib/.
APPENDIX A.

THE MINOR REQUIREMENT

In addition to studies in chemical and biological engineering, the Ph.D. candidate is required to undertake a program of course work in a field other than chemical and biological engineering. The purpose of the minor is to add breadth to the Ph.D. major. This requirement may be satisfied by a departmental minor (option A) or a distributed minor (option B).

The minor, whether Option A or B, is designed to represent a coherent body of work, and should not be simply an after-the-fact ratification of a number of courses taken outside the major department. To ensure coherence, the student must consult with their advisor. The Ph.D. Minor Agreement Form should be submitted for approval at an early date, before the student is halfway through the proposed course sequence. The minor program must be approved by both the student’s advisor and the appropriate department.

MINOR OPTION A
For Minor Option A, the student is required to complete at least 9 graduate credits in a single department. The program of course work must be approved by the minor department. Departments may have specific course requirements for their minor and may require more than the 9-credit minimum. The student must meet the requirements of the minor department for satisfactory completion of the minor.

MINOR OPTION B (DISTRIBUTED)
If the needs of the student would best be served by preparation not available as a departmental minor the department may permit the student and the advisor to develop a special program in lieu of a departmental minor. To meet the requirements of this Minor Option B, the student must complete at least 9 graduate credits in two or more departments outside the major, in related courses selected for their relevance to the student’s particular area of concentration. The proposed program of course work must be approved by the Department of Chemical and Biological Engineering.

TIMING
Students must request approval of their minor program before they are halfway through the proposed minor courses. Because the Ph.D. minor must be declared at the time the preliminary warrant is requested from the Graduate School, minors must be approved at least one month before the preliminary exam date. The approval process for Option B minors may take one month or more.

BASIC REQUIREMENTS
A GPA of 3.0 must be maintained in the minor. All courses must be 300 level or above, taken after the bachelor’s degree (or the equivalent). Students may not use 790, 890 or 990 (research and thesis) courses for their minor. No more than 5 credits completed 5 or more years prior to admission to the Ph.D. major may be used. Courses taken 10 or more years ago may not be used. Courses taken for pass-fail or for audit may not be used. Courses with grades of (S) satisfactory or Cr. (credit) are acceptable.

TRANSFER WORK
If you are requesting to use courses taken as a graduate student at another university (undergraduate courses cannot be transferred), submit your proposal early and include the following: (1) an official transcript, (2) a memo from the appropriate minor area indicating the course(s) taken at the other institution and their UW-Madison equivalent. It is also helpful to include a course syllabi, if available. Please note quarter hours are rounded to semesters: 4 quarter hours = 3 semester hours.

CHANGES IN MINOR COURSES
If a student’s minor courses change, they must submit a Revised Minor Agreement Form using the same process outlined above. The student may take approved courses in a different semester without submitting a new form.
APPENDIX B.

Ph.D. Minor Agreement Form
(Minimum 9 non-CBE credits)

Name: ________________________  Date: ______________
UW ID #: ______________________  Major: CHEMICAL & BIOLOGICAL ENGINEERING

THE PRELIMINARY EXAMINATION

SCOPE AND OBJECTIVES OF THE WRITTEN PRELIMINARY REPORT
The primary purpose of the written preliminary report and the ensuing comprehensive oral preliminary examination is to determine the potential of the applicant as a competent researcher. It is also an important objective of this procedure to ensure that the student begin their research career with an initial set of goals based upon a study of the pertinent literature, a logical analysis of the proposed research problem, and preliminary results. The student must show, in the report and oral examination, satisfactory evidence of initiative, imagination, and natural curiosity, and a high level of professional ability.

The written report shall be an original document prepared by the student. The written report should contain the following sections (sections 1-5 should not exceed 15 pages in total; subsection page lengths are for guidance only):

1. A concise abstract of the problem, approach, and expected outcomes (1 page)
2. A statement of the goals and motivation underlying the proposed research (3 pages)
3. A critical analysis of past studies relevant to the goals of the proposed research (3 pages)
4. A concise summary of the accomplishments to date (3 pages)
5. A description of plans for future research (5 pages)
6. A statement of safety considerations (no limit)
7. List of references, including the titles of the papers (no limit)

The document should be prepared using 12-point font, single spacing, and 1-inch margins. Figures are included in the page count. The document should not contain appendices.

While the scientific aspects of the proposed work should be discussed between the student and their advisor(s), the written document should be original work by the student. The student is responsible for all aspects of preparation of the written document and oral presentation, including proper citations, formatting, and proofreading.

PAGE LENGTH OF WRITTEN REPORT
The total preliminary report must not exceed 15 pages (single-spaced, including figures, 12-point font, 1-inch margins, not counting the section dealing with safety considerations and the list of references. Figures are included in the page count. The document should not contain appendices.

LENGTH OF ORAL PRELIMINARY EXAMINATION
The total length of the oral preliminary exam is 2 hours. The first 30 minutes of the exam will be devoted to the student’s presentation. The last 1 ½ hours will be reserved for questions from the committee members.

ASSESSMENT OF PRELIMINARY EXAMINATION AND QUALIFYING PROCESS
The student’s grade on the preliminary examination will be based on an evaluation of the 10 attributes listed on the attached rating sheet. Each member of the examination committee will submit a grade on a scale of 1.0 to 4.0, which is used to determine qualification for the Ph.D. program.

To qualify for the Ph.D. program, the average grade submitted by the committee must be 3.0 or higher.

After successful completion of the preliminary exam, the committee members will sign the warrant. If the student has also completed the major and minor requirements, the appropriate certifying signatures should be obtained on the warrant. The warrant should then be returned to the Graduate School. Students who have passed prelims, satisfied the major and minor requirements, and satisfied the residence requirement (as determined by the Graduate School) will be granted dissertator status.

Guidance in assigning grades in the preliminary exam:
Rate the candidate’s preliminary exam performance on a scale of 1.0 to 4.0 in .5 increments.

Ratings are to be based on the following attributes:
- Ability to define research problem
- Literature search
- Theoretical development; comprehension of theory and application to problem Planning of experimental procedures, thoroughness, regard for detail
- Maturity of judgment
- Originality
- Flair for research
- English composition: grammar, conciseness, and lucidness
- Neatness of composition, orderliness of presentation, clarity of drawings, figures, etc.
  Behavior and attitude on oral examination

Qualifying requirement:
For a student to qualify for the Ph.D. program in Chemical and Biological Engineering, the average grade on the preliminary exam must sum to 3.0 or higher.
APPENDIX G.

PREPARATION OF THESES FOR ADVANCED DEGREES

GRADUATE SCHOOL REGULATIONS

In the preparation and submission of M.S. and Ph.D. theses, it is important to satisfy the regulations of the Graduate School and the department. The Graduate School regulations, which focus primarily on the physical form of the thesis, are set forth in the following publications available on the Graduate School web site:

A Guide to Preparing Your Master’s Thesis
https://grad.wisc.edu/current-students/masters-guide/

A Guide to Preparing Your Doctoral Dissertation
https://grad.wisc.edu/current-students/doctoral-guide/

TECHNICAL CONTENT

The Department of Chemical and Biological Engineering is responsible for approving the technical content of the thesis. In general, the only requirement of the department is that all theses meet the standards of excellence to be expected of a candidate aspiring to an advanced degree. Agreement between the candidate and the major professor concerning the scope, content, and arrangement of the thesis is generally sufficient to satisfy this departmental requirement. Following is a general suggested outline of the order and contents of M.S. and Ph.D. theses that has been adopted by the department as a guide for candidates in the preparation of their theses. Modifications of this outline may be necessary to meet the needs of the individual. The emphasis should not be placed on adhering to a standard form, but rather on scholarly organization and clear presentation.

COMMITTEE COPIES

A copy of your thesis (or M.S. report) must be given to each member of your committee at least two weeks before your exam. These copies must be comb bound or coil bound, and printed or copied double-sided.

DEPARTMENT COPY

Since 1997, Memorial Library has been keeping electronic thesis copies for the Ph.D. level. To access a thesis, go to: https://www.library.wisc.edu/find/dissertations/.

DEPOSITING THE FINAL THESIS

Students upload their signed warrant at the ProQuest website when submitting their dissertation to the Graduate School. Students must submit their dissertation to the Graduate School by the semester deadline in order to graduate in the final term in which they are enrolled. For a list of deadlines go to: https://grad.wisc.edu/current-students/doctoral-guide/ and scroll down to DOCTORAL DEGREE DEADLINES.
As of Fall 2016, final review, or “checkout” with the Graduate School is optional. If you would like to have a final review with the Graduate School, go to https://grad.wisc.edu/current-students/doctrinal-guide/ and look to the section labeled “WHEN YOU ARE READY TO DEFEND AND DEPOSIT YOUR DISSERTATION WITH THE GRADUATE SCHOOL”. Go through the checklist and follow the steps listed to make an appointment. Copies of your thesis can be obtained through ProQuest: https://www.library.wisc.edu/find/dissertations/. Students are also responsible for completing and submitting the CBE Department’s Final Check-Out Form and returning it to the Graduate Program office (EH 2033).

The M.S. thesis (unbound) must be deposited at Memorial Library, room B137. You do not need to bring your M.S. thesis to the Graduate School for approval unless you choose to publish your thesis through UMI. The library does not accept theses by mail.

SUGGESTED ORDER OF CONTENTS FOR THESES

Title Page (See sample given in the Graduate School guidelines.)
Abstract (In the case of Ph.D. theses this may be identical with the 350-word abstract required by the Graduate School for UMI.)
Acknowledgments
Table of Contents (with page references)
List of Tables (with titles and page references)
List of Figures (with titles and page references)
I. Summary
   A. Statement of the problem
   B. Important results
   C. Conclusions and recommendations
II. Historical Background
   A. Critical survey of the theory
   B. Critical survey of the experimental work
   C. Reasons for this investigation
III. Complete Account of this Investigation
IV. Analysis of Results
   A. Results
   B. Conclusions
   C. Recommendations
V. Notation
VI. Appendices
VII. Bibliography

THE ABSTRACT AND THE SUMMARY

A clear distinction should be made between the abstract and the summary. The purpose of the abstract is primarily one of cataloging the contents as to scope and area of interest, whereas the summary is intended to give specific details concerning new results and recommendations for further study. The abstract should be short (350 words) and should be so written that it may stand alone; the summary, on the other hand, may be as much as 10 pages, and in it there may be references to the main body of the thesis. The abstract should be understandable to any
well-trained chemical engineer, whereas the summary may be written for one who is better acquainted with the topic being discussed.

ACKNOWLEDGMENTS

It is important that acknowledgment be given to all individuals and organizations who have contributed to the conduct and support of the research.

SUMMARY

Statement of the Problem: The purpose of this first paragraph of the summary is to acquaint the reader with the nature of the research problem. This is important to those persons who cannot give attention to all details of the work, but are required to become acquainted with the problem. This paragraph should contain a concise but complete statement of the problem studied and its applicability to chemical engineering. It should be made clear how this investigation will contribute to the advance of the profession. A clear statement of the objectives of the research must be included.

Important Results: This paragraph should include a statement of the specific results obtained as well as their importance in chemical engineering as a science or as a profession. Important formulae should be referred to or quoted, and reference to tables and figures in the main text should be made if such references are of help in summarizing the results.

Conclusions and Recommendations: The conclusions of the investigation represent a most important part of the thesis. Therefore, extreme care must be exercised in presenting these conclusions and in making recommendations on the basis of them. All conclusions should be based on the results of the research and should be properly qualified if based on uncertain results or speculations. Recommendations may concern proposals for new procedures, studies of new phases of the subject or different chemical systems, or applications to different processes. The latter might include recommendations for patents. Each recommendation should be concisely and clearly worded, and should be incorporated in a separate paragraph.

HISTORICAL BACKGROUND

This section should include a complete summary of previous theoretical and experimental studies made in this department and elsewhere, as reported in the technical literature and in patents. The results of research cannot be considered conclusive or original unless the previous work done in the field has been thoroughly reviewed and analyzed. Evidence of a mature understanding of previous work should be presented in this section, and literature references should be properly documented and quoted. The historical survey should lead quite naturally into a discussion of the reasons prompting the research reported in the thesis. The statement of the objectives should be reiterated in light of the historical discussion.

COMPLETE ACCOUNT OF THIS INVESTIGATION

In general, this section should comprise an orderly account of the original theoretical development and the experimental program completed in this investigation.

The varied nature of research projects in chemical engineering, and the desirability of maximum freedom of choice in reporting such projects preclude a detailed outline. However, it may be suggested that the reader would benefit from the following: method of planning the program
and designing the equipment and experiments, detailed construction diagrams and description of the experimental equipment, safety precautions and operating procedures, calculation procedures, and lists of all experimental runs made, where an extended program was carried out. It may be desirable to relegate some of this material to appendices.

It is particularly desirable to emphasize new and original features of the theory, calculation methods, equipment design and experimental technique.

ANALYSIS OF RESULTS

Considerable emphasis should be placed on an orderly presentation of results and comparisons between experimental data and various theories. Any data or correlations of questionable value should be carefully pointed out. It is advisable to include illustrative examples, when possible, to indicate how the results of the investigation may be used in practical chemical engineering calculations.

The conclusions should be discussed from the standpoint of the original objectives of the research. They should lead naturally to the formulation of concrete suggestions for future work. An indication of scientific maturity is the ability to chart a program of new research on the basis of results of completed research.
**APPENDIX H.**

**Ph.D. FINAL ORAL COMMITTEE APPROVAL FORM**

Please submit at least three weeks prior to the exam. Print clearly.

<table>
<thead>
<tr>
<th>Date</th>
<th>This is a/an (Circle one):</th>
<th>Original Form</th>
<th>Revised Form</th>
</tr>
</thead>

Student’s Full Name: (Last, First, Middle) ________________________________________________________________

Student’s 10-digit ID Number: 9________________________

Student’s Major: ______________________________ & Minor ________________________________________

This form, signed by the advisor/major professor and departmental chairperson, should be returned to the CBE Graduate Program office (EH 2033) at least 3 weeks before the final oral exam. An electronic request for a warrant is then sent to the Graduate School for approval. If any changes are made in the membership of the committee, a revised final oral exam form must be submitted before the exam. Changes in dissertation title or date do not require a revised form.

The following faculty members have agreed to serve on the Final Ph.D. Oral Exam Committee for the above named student. Effective September 1, 2017, three committee members must be designated as Readers. Please check names of readers in boxes below.

Proposed Dissertation Title: ____________________________________________________________

Proposed Date and time of Final Oral exam

______________________________________________

Signature: Advisor/Major Professor

______________________________________________

Signature: Department Chairperson
APPENDIX I.
Master’s Degree Warrant Request Form
Dept. of Chemical and Biological Engineering
University of Wisconsin-Madison

Name: _____________________ Date: _________________________________

Campus ID#: _____________________________

Procedure:
1. Choose your committee members in consultation with your advisor. Your committee will consist of 3 to 5 total members. If you do not plan to petition to return to the Ph.D. program, your committee may consist of 3-4 total people: your advisor(s) plus two additional CBE professors you and your advisor(s) choose. If you do plan to petition to return to the Ph.D. program, your committee will consist of 4-5 total people: your advisor(s) and 3 additional CBE professors that you and your advisor(S) choose.
2. Arrange a date and time for your examination.
3. Reserve a conference room for your examination (see staff in 2018 EH).
4. Submit this form to the Graduate Program office (2033 EH) at least 3 weeks prior to the date of your examination.
5. Distribute copies of your thesis to your committee members at least two weeks prior to your exam date. Copies must be printed double-sided and comb bound, tape bound, or coil bound.

M.S. Examining Committee Members:

Advisor(s): __________________________________________

___________________________________________

Two (2) or Three (3) additional CBE Professors:
