

Interested in learning more about industrial engineering? Connect with a current student!

The Department of Industrial and Systems Engineering is launching a peer mentorship program called ISyE Connections!

HOW DO I GET CONNECTED?

Fill out [this form](#) with your name, email, areas of interest, and additional details about your interests and questions. Then, you will receive an introductory email from a student with the subject line: "ISyE Connections Introduction." From there, you and a mentor will arrange to meet virtually.

WHAT CAN I EXPECT FROM THIS PROGRAM?

The goal is for you to have your questions answered and to learn more about studying industrial engineering and UW-Madison. You can ask questions about the different disciplines of the ISyE curriculum, or you can also ask about general topics such as internships, campus involvement, life in Madison, etc. Please feel free to elaborate on your interests and questions in the form! Even after you are connected with a student, you are always welcome to fill out the form if you want to learn about a different area of interest.

CAN I BECOME A MENTOR?

Yes! We are always looking for great mentors to represent the Industrial Engineering Department. If you are interested, please fill out [this survey](#) with your name, email, graduation date, student capacity, and focus areas.

I STILL HAVE QUESTIONS ABOUT THIS PROGRAM...

Feel free to email connections@ie.wisc.edu with any additional questions or concerns!
