

RECOMMENDED ENGINEERING PHYSICS CURRICULUM FLOWCHART

Effective for Students Entering EP Spring 2019 or later

¹ Topics from Math 321 are applied in Physics 322, and some students may find it helpful to take Physics 322 after Math 321 if Physics 322 is not required for focus area courses

² CS 300 or 412, or EMA/EP 471, or EMA 476. Students in the Scientific Computing Focus Area must take CS 412

³ Students are encouraged to take EP 468 during their 2nd year to allow for more flexibility in the research sequence

⁴ Students in the nanoengineering focus area should take Physics 531
